

Technische Universität München

Prof. dr.ir. Daniel J. Rixen, MSc

Curriculum Vitae

December 18, 2023

<i>Professional address</i>	Chair of Applied Mechanics Faculty of Mechanical Engineering Technische Universität München Boltzmannstr. 15 D - 85748 Garching Germany
<i>Tel.</i>	+49-89-289-15199 (secretary)
<i>Email</i>	rixen@tum.de
<i>Website</i>	www.mec.ed.tum.de/am
<i>Nationality</i>	Belgian
<i>Date of birth</i>	14 October 1967
<i>Marital status</i>	married, 2 sons and 1 daughter
<i>Language</i>	French (first tongue) ; English ; German ; Dutch.

Appointments

- since 2012 **Full Professor (Ordinarius)**, T.U. Munich (Germany)
Chair of Applied Mechanics
School of Engineering and Design
Dept. of Mechanical Engineering
- 2012–2016 **Guest Professor**, Delft University of Technology (The Netherlands)
Faculty of Mechanical, Maritime and Material Engineering
- 2000–2012 **Full Professor**, Delft University of Technology (The Netherlands)
Chair of Engineering Dynamics
Faculty of Mechanical, Maritime and Material Engineering
- 1999–2002 **Senior fellow**
of the Belgian National Scientific Research Foundation
(Chercheur qualifié FNRS)
On leave
- 1997–1999 **Fellow**
of the Belgian National Scientific Research Foundation
(Chargé de Recherches FNRS)
Post-doctoral research assistant
University of Colorado at Boulder, USA
Center for Aerospace Structures (Prof. C. Farhat)
Topic: *Domain Decomposition–Fluid-Structure Interaction*
- 1993–1997 **Doctorate fellowship**
of the Belgian National Scientific Research Foundation
(Aspirant FNRS)
Research assistant at the University of Liège
Laboratoire des Techniques Aéronautiques et Spatiales (Prof. M. Géradin)
Topic: *Dynamic Substructuring–Parallel Computing–Non-linear Dynamics*
- 1991–1992 **Research Assistant**
Laboratoire des Techniques Aéronautiques et Spatiales (Prof. M. Géradin)
Topic: *Structural Vibrations–Multibody Dynamics*
- 1990 **Support Engineer**
Samtech Belgium

Guestships

- 2023 (2 months) **Visiting Professor**, University of Waterloo (Canada)
Systems Design Engineering
Canada Research Chair in System Dynamics - Prof. J. McPhee
- 2023 (4 months) **Visiting Professor**, ETH Zürich (Switzerland)
Dep. of Mechanical and Process Eng.
Chair in Nonlinear Dynamics- Prof. G. Haller and Dr. P. Tiso
- 2002 & 2004 **Visiting Professor**
Ecole Normale Supérieure de Cachan (France)
dr. C. Rey (2 months)
- 1997–1999 **Post-Doctoral researcher**
University of Colorado at Boulder (USA)
Prof. C. Farhat
- 1993 & 1994 **Guest researcher**
University of Waterloo (Canada)
Prof. J. McPhee (2 months)

Degrees

- 1997 **Doctorate in Applied Sciences** (Highest honors)
University of Liège (Belgium) - Aeronautical and Space Lab (LTAS)
Thesis: *Substructuring and Dual Methods in Structural Analysis*
Supervisor: *Prof. dr.ir. M. Géroardin*
- 1989–1990 **Master in Aerospace Vehicle Design**
Cranfield Institute of Technology (College of Aeronautics), U.K.
Thesis: *Finite Strip Method for Stability and Vibration Analysis*
Master project: *Tactical Fighter - Air Intake and Powerplant Installation*
Double degree program (Erasmus - British Council)
- 1985–1990 **Engineering degree in Electro-Mechanics and Aerospace** (Highest honors)
University of Liège (Belgium)
- 1979–1985 High School St. Remacle, Stavelot (Belgium)
Majors: *Mathematics & Latin*

Research

The research of Prof. Rixen is focusing on the development of theoretical formulations, numerical methods and experimental techniques aimed at a better understanding and efficient simulation of the dynamics observed in complex structures and robotic systems. Although academic in nature, the innovative ideas resulting from the research are often tested and implemented on engineering applications. Numerous collaborations with industry and experts from other fields not only valorize the scientific advances, but also stimulates the developments of unusual concepts and inspires young research associates.

For his research, Prof. Rixen works closely with colleagues or industrial partners in order to apply the developed methodologies to engineering applications such as wind turbines, automotive, biomedical, aeronautics and aerospace, microsystems and machines.

Prof. Rixen has co-authored a book on Theory of Vibrations (in French and in English), another one on Substructuring techniques, published about 140 articles in peer-reviewed international scientific journals and made more than 350 contributions to peer-reviewed international conferences (as author and co-author). He also regularly serves as reviewer and guest editor for several international scientific journals and is involved in numerous national and international scientific and academic committees. He has personally supervised more than 50 MSc thesis and 30 PhD projects.

The research activities can be described according to 4 aspects shortly summarized below.

Numerical methods for engineering dynamics Discretisation techniques and solution methods for efficient modeling the structural vibrations and multibody dynamics is one of the research directions. This includes finite element formulations, eigensolvers and time-discretisation techniques. In particular, efficient solvers for very large problems are investigated, developing parallel computing algorithms based on domain decomposition approaches and exploring novel substructuring techniques to reduce the size of dynamic models. In particular the reduction of non-linear dynamical models is a very active research topic.

Experimental dynamics Understanding the dynamics of structures requires observing and measuring academic and engineering structures. In addition to using classical Experimental Modal Analysis techniques, research is performed on identification methodologies applicable to operating machines where the excitation (input) is unknown. The paradigm of substructuring is applied in order to combine measurements and models of subcomponents, and predict the behavior of entire assemblies (experimental substructuring).

Modeling of multifield coupling relevant to structural dynamics In modern engineering, interaction of structures with non-structural effects become significant. Specific approaches are developed to properly model such coupling phenomena: aeroelastic coupling on aircraft, hydrodynamic forces in bearings and rotordynamics, vibro-acoustic nuisance in MRI scanners or electrostatic and thermo-mechanical interaction in microsystem sensors.

Robotics and mechatronical systems Since he took over the chair of Applied Mechanics of the Department of Mechanical Engineering at the TU Munich, he has been heavily involved in robotic projects. The main research interests are the planning and control of two-leg robots and manipulators. In addition, he started a new research area concerned with real-time substructuring techniques where advanced control strategies are developed to test vibration components and prostheses in a hard-ware-in-the-loop environment.

Temporary appointments

since 2023	Advisory Council of the Institute for Advanced Study, TU Munich
since 2023	member of the scientific advising committee of Safran Group (France)
since 2021	member of the Board of Directors of the Munich Institute of Robotics and Machine intelligence
2020	president of the Society of Experimental Mechanics (USA)
2016–2021	Spokesperson of the Faculty Graduate Center Mechanical Engineering
2015-2019	vice-dean of the Department of Mechanical Engineering
since 2012	Member of the exam commission (BSc & MSc) of the Faculty of Mechanics T.U. München
2011–2014	Scientific advisor for Michelin on parallel computing algorithms
2012–2013	Scientific advisor for Atlas Copco, Belgium
2001–2012	Member of the board of directors Engineering Mechanics Graduate School, The Netherlands
2008–2012	Responsible for the BSc/MSc curriculum of the Department Precision and Microsystems Engineering
2008–2012	Board of the Delft Center for Computational Science and Engineering
2008–2012	Member of the Delft University Wind energy research institute (DUWind)
2007–2008	Member of the National Committee, French National Center for Scientific Research (CNRS), section of Materials & Structures Engineering, Solid Mechanics & Acoustics
2006–2007	Scientific advisor for Open Engineering (Belgium)
2001	Scientific advisor for Snecma - Division Moteurs Spatiaux, Vernon, France Technical Auditing turbo-pump on engine Ariane 5
1999 & 2000	Lecturer in Engineering Dynamics
& 2002	European Master in Mechanics of Constructions, Ho Chi Minh, Vietnam
1996 & 1997	Lecturer in Structural Dynamics Pôle Universitaire Léonard de Vinci, Paris

Membership and mandates

since 2017	scientific council of CISM, Udine (Italy)
since 2015	scientific committee for the AIVELA International Conference (Italian Association of LAser VElocimetry and non invasive diagnostics)
since 2014	scientific committee of ISMA, Noise and Vibration Engineering Conference (KUL, Leuven Belgium)
since 2014	Member of board IFToMM Germany
since 2014	Member of Technical Committee for Vibrations, IFToMM
2014 - 2016	Executive Board of the Society of Experimental Mechanics (USA)
since 2013	Board Member of the Likar Foundation, München
since 2002	Member of the Society of Experimental Mechanics (USA)
since 2012	scientific committee of the <i>colloque National en Calcul des Structure</i> (France)

Lectures and education

since 2012	Technical Mechanics 1, 2 and 3 (BSc) Engineering Dynamics (MSc) Structural Dynamics (MSc) Experimental Vibration Analysis (MSc) Robot Dynamics (MSc) Dynamics of Mechanical Systems (MSc) Introduction to Multibody Dynamics (MSc)
2024	Experimental Substructuring (Post-graduate, CISM Udine)
2018	Substructuring in Engineering Dynamics (Post-graduate, CISM Udine)
2000–2012	Mechanics (BSc) Engineering Dynamics (MSc) Numerical Methods in Computational Dynamics (MSc) Introduction to Fluid-Structure Interaction (MSc) Mechanical Analysis for Engineering (MSc) Advanced Dynamics (Post-graduate, EM Doctoral School) Multibody Dynamics (Post-graduate, EM Doctoral School) Non-linear Dynamics (Post-graduate, EM Doctoral School)
1991–2000	Theory of Vibration (MSc) Aeroelasticity (MSc)

Awards

2023	D.R. Harting Award of the Society of Experimental Mechanics (SEM. USA). Outstanding Paper Award of the journal <i>Experimental Techniques</i> [1]
2020	Award for best MSc. online course, Faculty of Mechanical Engineering, TUM
2011	Finalist of the Delft Innovation Award
2009 & 2010	Award for best lecturer of the faculty for MSc studies
2006 & 2007	Award for best lecturer of the faculty for the 3rd BSc year
1997	Award of the Association des Amis de l'Université de Liège, best PhD thesis at the Faculty of Applied Sciences
1990	British Aerospace Award, best MSc thesis in Aerospace Vehicle Design

Supervised PhD thesis
