

Call for Papers

Production Engineering

Research and Development

ISSN: 0944-6524 (print version)

ISSN: 1863-7353 (electronic version)

Dear fellow researchers,

we kindly invite you to contribute to the 2019 special issue of the international journal **Production Engineering**, Research and Development. The volume, that is to appear at the beginning of 2019, will be devoted to new research results in the field of **Residual Stresses in Production Technology**. As stated in the Aims & Scope, “the journal reports peer reviewed results of latest research in industrial engineering, production engineering and industrial organization. The high level and focus on both the scientific as well as the practical impact of the selected papers will bridge the gap between research and successful industrial application.” The journal can be seen as the voice of the German Academic Society for Production Engineering. It is distributed worldwide in print and online.

For the special issue we are looking forward to contributions covering all fields of the topic from anywhere in the world:

Residual Stresses in Production Technology

- ➔ Influence of manufacturing process and process parameters
- ➔ Stability and Reproducibility
- ➔ Simulation
- ➔ Methods of Measurement
- ➔ Influence on the fatigue behaviour

Contributions must clearly show new and significant findings. They have to describe original work which has not been published previously and should be maximum 4,500 words in length. An international editorial committee will make the final decision on the acceptance of all papers. The submission deadline for the full paper is August 1, 2018. Please indicate your interest in submitting a paper by sending an e-mail including an abstract (600-800 words) to spp2013@tum.de latest by June 30, 2018. After acceptance of the abstract you will be given detailed instructions on how to submit your paper online.

I would be delighted to receive a contribution from you. Please feel free to contact me with any questions you might have.

Best Regards,

Yours sincerely

Wolfram Volk
